Fifty Years of Innovation

50 Years of Progress

50 years ago a small company convinced of the potential of glass fibre reinforced plastic (GRP) sold a halt sign, that never needed painting, to a local authority.

The company was Glasdon, it pioneered the use of plastic material for road signs and street furniture, which offered low cost and long life compared to conventional materials.

The use of low maintenance GRP, for this application, was an early demonstration of the innovative flair which has characterised the company ever since.

50 Years of Product Innovation

With 50 years of experience, Glasdon's in-house design team has gained vast knowledge in all aspects of product design and material selection. The department utilises the very latest computer aided design technology, with 3D modelling. Independent product testing also helps to ensure that Glasdon products meet our customers' exacting standards in terms of aesthetics, function and service life.

50 Years of Products for your Environment

With its reputation for offering a wide range of products, designed to enhance the environments in which we all live and work, Glasdon is firmly established as a market leader.

We are a socially responsible Company and have achieved ISO 14001 environmental management system accreditation. We are committed to both recycling in our business and the innovative use of recycled materials in the manufacture of our products.

50 Years of Highest Quality Service and Customer Care

Glasdon's commitment to customer service means that a fully trained team of sales representatives and technical staff is available to our customers for product demonstrations, enquiries and after sales service. During our normal working hours our telephones are always answered by our customer service teams. This reflects our resolve to never use automated telephone answering systems.

For all our standard products, as far as possible, we aim to offer ex-stock delivery and the quickest possible lead time for bespoke orders. Products are carefully delivered by our drivers in our own fleet of delivery vehicles.

Quality Control checks being undertaken.

50 Years of Best Quality and Value

Supporting Glasdon in-house manufacturing and assembly in our modern factories, over many years, we have established a network of proven, high quality suppliers who work with us to meet our stringent ISO 9001 Quality Assurance standards.

To ensure that all Glasdon products offer best quality and value, we place great emphasis on material selection, efficient manufacturing and never sacrifice quality for price.

Glasdon have been accredited under a registered quality management system since 1991. We are currently certified to ISO 9001:2008, an international standard related to quality management, based on key quality management principles, such as customer focus.

Nexus[®] 200

Nexus 200 is a twin liner litter bin with a slimline, elliptical shape which takes up minimal space on the pavement, whilst the apertures are visible from all angles. Its large 200 litre capacity reduces the need for frequent emptying in areas where high volumes of litter are created. Recycling bin variants can also be supplied with recycling panels and graphics.

Design Features

- Curved hood prevents littering.
- Two robust interlocking slam shut doors.
- Single keyed twin door provides easy emptying and cleaning.
- Large recessed lifting handles, suitable for use with a gloved hand.
- Aperture ledges ensure litter always enters the liner.
- Unique corrosion free locking mechanism.
- Integrally moulded ridges deter flyposting and graffiti.
- Includes Bin-it™ symbols in Gold or Silver.

Optional Extras

- Cigarette stubber plate in Gold or Gun Metal Grey colour.
- Cigarette ashtray with a 5 litre liner in Gold or Gun Metal Grey colour.
- Glasdon FireSafe Automatic Suppression Device.
- Aperture blanking panels.
- 2 x 100 litre Durapol liners.
- Sack retention.
- Base tray.

Materials

Bin body & door: Durapol®.
Metal liners: Galvanised mild steel.
Plastic liner: Polyethylene.

Specifications

Bin volume: 2 x 136 litres
Liner capacity: 2 x 100 litres
Height: 1177mm
Width: 1169mm
Depth: 591mm
Weight: 51kg (with steel liner)

Colours

Black, Anthracite Grey.

Nexus[®] 360

Nexus 360 combines contemporary style with robust construction and is designed to co-ordinate with the Nexus 200. Nexus 360 will house a 360 or 240 litre wheeled container, which is ideal for mini bring sites, promenades, lay-bys and town centres where high volumes of litter are created. Nexus 360 has a curved sloping body to prevent littering and features a strong, robust 5-point interlocking slam shut door. Recycling bin variants can also be supplied with recycling panels and graphics.

Design Features

- Large recessed lifting handle, suitable for use with a gloved hand.
- Integrally moulded ridges deter flyposting and graffiti.
- Unique corrosion free locking mechanism.
- Aperture ledges ensure litter always enters the liner.
- Base ramp aids insertion/removal of the wheeled container.

Material

Bin body & door: Durapol.

Specifications

Liner capacity: 240 litres or 360 litre wheeled container
Height: 1512mm
Width: 616mm
Depth: 1071mm
Weights:
Housing: 39kg (no wheeled container)
Door: 11kg

Colours

Black, Anthracite Grey.

Optional Extra

- Glasdon FireSafe Automatic Suppression Device.

Constructed from tough Duracore™ material, Brunel bin is probably the most rigid litter bin made relative to its weight. Brunel Bin is supplied complete with an elegant moulded-in crest detail on all sides except the door.

Design Features

- Gold litter legends and bands.
- Moulded knuckle-hinge door.
- Two point locking system, key to open, slam to lock.
- Zinc-coated steel liner, moulded plastic liner or sack retention system.
- Bolts for permanent ground fixing into pavements or concrete.

Optional Extras

- Hood mounting ashtray.
- Cigarette stubber plate.
- Firexpire® fire extinguishing device.
- Choice of ground fixing options.
- Personalisation, moulded-in or polycarbonate plaque.
- Plastic sacks for use with sack retention.

Materials

Bin body & door: Duracore.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Polyethylene.
Sack retention system: Stainless steel.

Specifications

Bin volume: 120 litres
Liner capacity: 100 litres
Height: 954mm
Width: 535mm
Depth: 535mm
Weight: 27.9kg (with steel liner)

Colours

Jubilee Maroon, Jubilee Green, Black.

Glasdon Jubilee™

A new traditionally designed aesthetically pleasing litter bin. The Glasdon Jubilee litter bin offers exceptional features. A hidden lift and lock mechanism engages in a 3 point interlocking slam shut door. The unique ribbed design deters flyposting and graffiti. The domed hood makes the litter bin strong and robust and helps to prevent littering. Recycling bin variants can also be supplied.

Design Features

- Domed textured stubber plate in Gold or Gun Metal Grey.
- Domed hood.
- Four apertures.
- Anti-flyposting finish.
- Robust interlocking slam shut door.
- Concealed knuckle hinge.
- Keyed or foot activated keyless lock.
- Liner tray/bait box area.

Optional Extras

- Glasdon Jubilee ashtray kit (Gold or Gun Metal Grey).
- Glasdon Jubilee aperture stubber kit.
- A4 poster frame.
- Liner elastic sack retention.
- A5 personalisation (supplied as a vinyl sticker or polycarbonate plaque).

Materials

Bin body & door: Durapol.
Liner: Mild steel.

Specifications

Bin volume: 130 litres
Liner capacity: 110 litres
Height: 1158mm
Width: 598mm
Depth: 553mm
Weight: 26kg (with steel liner)

Colours

Black (100% Recycled Material), Millstone, Dark Blue, Deep Green, Grey, Anthracite Grey.

Streamline Jubilee™

The Streamline Jubilee litter bin is ideal for areas such as bus stops and narrow streets where a larger bin may not be required. The streamline shape of the bin allows the bin to be sited in almost any location. Recycling bin variants can also be supplied with recycling panels and graphics.

Design Features

- Curved textured stubber plate.
- Domed hood.
- Two apertures.
- Concealed knuckle hinge.
- Keyed or foot activated keyless lock.
- Litter legends and bands.

Optional Extras

- Ashtray kit (Gold or Gun Metal Grey).
- Aperture stubber plate kit.
- A4 poster frame.
- Liner elastic sack retention.

Materials

Bin body & door: Durapol.
Liner: Mild steel.

Specifications

Bin volume: 85 litres
Liner capacity: 70 litres
Height: 1170mm
Width: 583mm
Depth: 406mm
Weight: 23kg (with steel liner)

Colours

Black (100% Recycled Material), Millstone, Dark Blue, Deep Green, Anthracite Grey.

Enviropol® 100

Hard-wearing and durable Enviropol 100 bin is manufactured from Enviropol® and Durapol materials and will withstand all weathers. Enviropol 100 is 100% recyclable.

Design Features

- Bin-it symbol in Gold on Black polycarbonate plaque.
- Anti-burst lock, key to open, slam to lock.
- Zinc-coated steel liner, moulded plastic liner or sack retention system.
- Bolts for permanent ground fixing into pavements or concrete.

Optional Extras

- Cigarette stubber plate.
- Firepire fire extinguishing device.
- Choice of ground fixing options.
- Litter aperture flaps.
- Personalisation.
- Plastic sacks for use with sack retention.

Materials

Bin body slats: Enviropol.
Hood & plinth: Durapol.
Frame: Stainless steel.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Polyethylene.
Sack retention system: Stainless steel.

Specifications

Bin volume: 120 litres
Liner capacity: 100 litres
Height: 1080mm
Width: 540mm
Depth: 500mm
Weight: 50kg (with steel liner)

Colours

Slats: Brown Enviropol, Black Enviropol.
Hood & Plinth: Black.

Topsy Jubilee™

Topsy Jubilee bin is a Victoriana-style litter container, manufactured in Durapol material with a stylish textured finish.

Design Features

- Gold litter legends and bands.
- Key-locking system.
- Zinc-coated steel liner or moulded plastic liner.

Optional Extras

- Hood mounted ashtray.
- Other ashtray options.
- Cigarette stubber plate.
- Firepire fire extinguishing device.
- Choice of ground fixing options.
- Personalisation, aluminium plaques, Black on Gold or Gold on Black.

Materials

Bin body: Durapol.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Polyethylene.

Specifications

Bin volume: 125 litres
Metal liner capacity: 125 litres
Plastic liner capacity: 100 litres
Height: 1100mm
Maximum diameter: 560mm
Weight: 17kg (with steel liner)

Colours

Jubilee Maroon, Jubilee Green, Deep Green, Black.

Plaza®

Featuring the Glasdon keyless locking system providing high security and easy emptying without the need for a key. The hooded design keeps out rain and strong winds.

Design Features

- Bin-it symbol in Gold, Silver, Black or White.
- Keyless locking system.
- Zinc-coated steel liner or moulded plastic liner.

Optional Extras

- Hood mounted ashtray.
- Other ashtray options.
- Cigarette stubber plate.
- Firepire fire extinguishing device.
- Choice of ground fixing options.
- Litter aperture flaps.
- Two decorative Gold or Silver bands.
- Personalisation.

Materials

Bin body & plinth: Durapol.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Polyethylene.

Specifications

Bin volume: 120 litres
Liner capacity: 100 litres
Height: 1041mm
Diameter: 602mm
Weight: 19.2kg (with steel liner)

Colours

Millstone, Sandstone, Granite, Dark Blue, Deep Green, Maroon, Black.

Topsy 2000™

Purpose-designed for easy emptying without the need for strenuous lifting. The whole bin body lifts off the base, the liner then requires only a short lift.

Design Features

- Bin-it symbol in Gold, Silver, Black or White.
- Keyless locking system or 5 point key-lock.
- Zinc-coated steel liner or moulded plastic liner.

Optional Extras

- Hood mounted ashtray.
- Other ashtray options.
- Cigarette stubber plate.
- Firexpire fire extinguishing device.
- Choice of ground fixing options.
- Litter aperture flaps.
- Billy Bin-it logo or Help Protect Our Environment logo.
- Personalisation.

Materials

Bin body: Durapol.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Polyethylene.

Specifications

Bin volume: 110 litres
Liner capacity: 90 litres
Height: 1000mm
Diameter: 545mm
Weight: 15kg (with steel liner)

Colours

Bright Red, Yellow, Light Blue, Dark Blue, Light Green, Deep Green, Black, White, Light Grey.

Luna™

Luna litter bin is a contemporary styled litter bin with a narrow footprint. A large open top design makes it ideal for the quick and easy depositing of litter. A new purpose designed sack retention system neatly holds the sack in position within the bin, creating an aesthetically pleasing unit. As an optional extra the curved hood helps protect contents from the elements.

Design Features

- Bin-it symbol in Gold, Silver, Black or White.
- Sack retention system.

Optional Extras

- Curved hood.
- Cigarette stubber plate.
- Tapered steel liner.
- Personalisation.

Materials

Bin body, hood & sack holder: Durapol.
Liner: Zinc-coated steel.

Specifications

Capacity: 60 litres
Height (Open model): 795mm
Height (Hooded model): 945mm
Width: 566mm
Depth: 443mm
Weight (Open model): 5kg
Weight (Hooded model): 7kg

Colours

Millstone, Sandstone, Cool Dark Grey, Black (100% Recycled Material).

Super Guppy™

Super Guppy litter bin is manufactured in strong, weather resistant Durapol material. It has a smooth low maintenance finish and a lockable lid.

Design Features

- Bin-it symbol in Gold, Silver, Black or White.
- Key-lock.
- Zinc-coated steel liner.

Optional Extras

- Ashtray options.
- Cigarette stubber plate.
- Firexpire fire extinguishing device.
- Choice of ground fixing options.
- Personalisation.

Materials

Bin body: Durapol.
Metal liner: Zinc-coated steel.

Specifications

Bin volume: 95 litres
Liner capacity: 85 litres
Height: 965mm
Diameter: 449mm
Weight: 11.3kg (with steel liner)

Colours

Bright Red, Yellow, Light Blue, Dark Blue, Light Green, Deep Green, Beige, Brown, Brown/Beige, Light Grey, Black.

Stanford™

An octagonal-shaped heritage style litter bin, manufactured from 100% recycled cast aluminium. Stanford bin has a tough, robust design, which is weather, fire and vandal resistant.

Design Features

- Two decorative bands, Gold or Silver on the Black model, Black or Dark Blue on the Silver model.
- Anti-burst lock, key to open, slam to lock.
- Zinc-coated steel liner or moulded plastic liner.
- Bolts for permanent ground fixing into pavements or concrete.

Optional Extras

- Cigarette stubber plate.
- Firexpire fire extinguishing device.
- Choice of ground fixing options.
- Polycarbonate plaque with Gold or Silver litter legend and crest detail.
- Personalisation.

Materials

Bin body & door: Recycled cast aluminium.
Metal liner: Zinc-coated steel.
Moulded plastic liner: Durapol.

Specifications

Bin volume: 95 litres
Liner capacity: 85 litres
Height: 984mm
Maximum diameter: 517mm
Weight: 52kg (without liner)

Colours

Black, Silver.

Tough Metal Construction

Metal Chieftain™

Metal Chieftain is Armortec® coated for outstanding durability, which minimises the requirement for the expensive refurbishment that is often associated with metal litter bins. Metal Chieftain has a large front opening hinged door, to allow unrestricted access to the liner. The extremely robust hinge incorporates a stainless steel reinforcing rod that runs the full length of the door. The robust construction of the litter bin makes it ideal for unsupervised areas, as it is fire, corrosion and vandal resistant.

Design Features

- Bin-it symbol in Gold or Silver.
- Two decorative bands in Gold or Silver.
- Anti-burst lock, key to open, slam to lock.
- Zinc-coated steel liner.

Optional Extras

- Hood mounted ashtray.
- Cigarette stubber plate.
- Choice of ground fixing options.
- Personalisation.

Materials

Bin body & door: Armortec coated steel.
Metal liner: Zinc-coated steel.

Specifications

Bin volume: 105 litres
Liner capacity: 90 litres
Height: 1035mm
Maximum diameter: 515mm
Weight: 55kg (with steel liner)

Colours

Black, Deep Green.

(Special colours can be supplied. Please apply for price and minimum order quantity details and lead times.)

Tough Metal Construction

Metal Guppy™

Metal Guppy is a fire-resistant metal bin, ideal for high-risk areas.

Design Features

- Bin-it symbol in Gold, Silver, Black or White.
- Key-lock.
- Zinc-coated steel liner.

Optional Extras

- Cigarette stubber plate.
- Firexpire fire extinguishing device.
- Choice of ground fixing options
- Personalisation.

Materials

Bin body: Armortec coated steel.
Liner: Zinc-coated steel.

Specifications

Bin volume: 95 litres
Liner capacity: 85 litres
Height: 961mm
Diameter: 460mm
Weight: 26kg (with steel liner)

Colours

Black, Silver.

Tough Metal Construction

Evolution™

A contemporary styled litter bin to complement all locations. The elliptical design and curved hood gives the litter bin a vandal resistant shape, whilst the robust door adds to the bin's strong appeal.

Design Features

- Bin-it symbol in Gold, Silver or White.
- Moulded knuckle-hinge door.
- Anti-burst lock, key to open, slam to lock.
- Zinc-coated steel liner.

Optional Extras

Envoy Cup Bank

Nexus[®] 200

Nexus 200 is a twin liner recycling bin incorporating separate body compartments to prevent cross contamination of waste. Nexus 200 has a slimline, elliptical shape which takes up minimal space on the pavement, whilst the apertures and recycling graphics are visible from all angles.

Design Features

- Supplied with 2 x 100 litre zinc-coated steel liners.
- Two robust interlocking slam shut doors.
- Curved hood prevents littering.
- Anti fly-posting finish.
- Colour-coded apertures and Standard Recycling Graphics are visible from all angles.
- Recessed Standard Recycling Graphics above the apertures will encourage correct usage.
- Includes four A3 poster frames with Standard Recycling Graphics.

Optional Extra

- Glasdon FireSafe Automatic Suppression Device.

Material

Bin body: Durapol.

Specifications

Bin volume: 2 x 136 litres
 Liner capacity: 2 x 100 litres
 Height: 1177mm
 Width: 1169mm
 Depth: 591mm
 Weight c/w steel liners: 51kg
 Weight c/w Durapol liners: 46kg

Colours

Bin body: Black, Anthracite Grey.
 Apertures: Orange, Lime Green, Warm Red, Grey, Dark Aqua, Azure Blue, Black.

Nexus[®] 360

Nexus 360 Recycling Housing combines contemporary style with robust construction. Nexus 360 will house a 360 or 240 litre wheeled container, which is ideal for mini bring sites, promenades and town centres where high volumes of litter are created.

Design Features

- Houses a 240 litre or 360 litre wheeled container.
- Robust interlocking slam shut door.
- Curved sloping body and hood prevents littering.
- Integrally moulded ridges deter fly-posting and graffiti.
- Available with colour-coded apertures and Standard Recycling Graphics.
- Includes an A3 poster frame with Standard Recycling Graphics.
- Base Ramp aids insertion/removal of the wheeled container.

Optional Extra

- Glasdon FireSafe Automatic Suppression Device.

Material

Bin body & door: Durapol.

Specifications

Liner capacity: 240 litre or 360 litre wheeled container
 Height: 1212mm
 Width: 616mm
 Depth: 1071mm
 Weights: Housing: 39kg (no wheeled container)
 Door: 11kg

Colours

Bin body: Black, Anthracite Grey.
 Apertures: Orange, Lime Green, Warm Red, Grey, Dark Aqua, Azure Blue, Black.

Mirage[™] Range

Durable recycling bins with a modern, metallic finish that will not show fingerprints. Mirage bins are available in a choice of 60 litre or 80 litre capacities and are ideal for areas where space is limited as they have a narrow footprint.

Design Features

- Choice of three aperture options:-
 - Cans or bottles aperture.
 - Paper aperture.
 - General Waste handle.
- Supplied with a sack retaining feature.
- Metallic silver finish will not dent or rust.
- Unit connector kit.

Optional Extra

- Personalisation.
- Plastic sacks for use with sack holder.

Material

Bin body: Duraplene.

Specifications

	60 litre model	80 litre model
Capacity:	60 litres	80 litres

Nexus® 130 Recycling Bin

A durable, high capacity recycling bin suitable for indoor or outdoor use, Nexus 130 is available in pastel grey or recycled black and is ideal for collecting large volumes of recyclable waste.

Design Features

- Corrosion-free sack retention bands.
- Durable keyed lock.
- Tapered body for stacking and storage.

Optional Extra

- Recycle Now Graphics for lid and body.
- Lid without lock.
- Ground fixing holes.

Material

Bin body & hood: Durapol.

Specifications

Capacity: 130 litres Height: 940mm
Maximum diameter: 588mm Weight: 7.5kg

Colours

Body: Pastel Grey.
Hood: Light Blue (paper only), Red (Cans or Bottles only), Dark Grey (Cans or Bottles only), Black (General Waste) (100% recycled material).

C-Thru™ Trio

Nexus® 130 Trio

Recycle Now Sticker Kits for Trio Hoods. Other options are available. Please contact our Sales Office for details.

Specifications

Capacity: 180 litres (3 x 60 litres)
Height:
Hooded Top: 1070mm
Open Top: 966mm
Diameter: 590mm
Weight:
Hooded Top: 11.2kg
Open Top: 10.8kg

Design Features

- A Trio Recycling Hood is available for Nexus 130 and C-Thru Recycling Bin, to allow the segregation of three waste streams within one unit.
- Two models are available, an Open Top model which is ideal for indoor use and a Hooded Top model, which provides weather-resistance for outdoor use.
- Choice of Apertures for the collection of Newspapers and Magazines, Plastic Bottles, Cans, Mixed Glass or General Waste.
- Clear graphics provide easy identifiable waste streams and help to prevent cross-contamination.
- Keyed-lock prevents unauthorised removal of hood.
- A unique sack retention system supports three sacks within the bin, and allows flexible waste stream capacities to maximise bin volume.

- The sack retention system is removable for easy emptying.
- The Trio Hood features zinc-coated steel dividers to prevent cross-contamination of waste.

Optional Extras

- Stubber plate for the Hooded Top model.

Colours

Open Top/Hooded Top: Black, Anthracite Grey.
Aperture Options and Recycling Graphics: Black and White (General Waste), Red (Plastic Bottles only), Green (Mixed Glass), Grey (Cans only), Blue (Newspapers and Magazines only).

Other options are available. Please contact our Sales Office for details.

Please specify your choice for apertures and sets of Recycle Now Graphics at point of order.

Space-Liner™

Space-liner orderly barrow can be used for litter collection and segregation of waste or for transporting equipment. The Double Space-Liner model can use its two 100 litre containers for segregation of two different waste streams, such as for the collection of General Waste and Mixed Recyclables. An optional divider is also available to transform a 100 litre container into 2 x 50 litre compartments, to suit all types of waste collection.

Design Features

- Single or double unit available.
- Front moulding.
- Solid rubber tyres.
- Collection container/s.
- Jockey wheels.
- Reflectors.
- Brush brackets.
- Sack retention system in one container.

Optional Extras

- Brake unit.
- Pneumatic tyres.
- Collection container divider.
- Operator's box divider.
- Extra sack retention system.
- Personalisation.
- Plastic sacks for use with sack retention.
- Sack hook for additional storage.

Materials

Frame: Mild steel with Armortec coating.
Main container, lids and front moulding: Durapol.
Operator's box: Duraplus.

Specifications

	Double Model	Single Model
Container capacity:	2 x 100 litres	1 x 100 litres
Total height:	970mm	970mm
Total length:	1760mm	1340mm
Total width:	630mm	630mm
Total weight:	53kg	42kg

Colours

Lids and front moulding: Red, Yellow, Dark Blue, Light Green, Purple.
Container bases: Cool Light Grey.

Skipper™

Skipper multi-purpose cleaning and service trolley is ideal for use when sweeping and cleaning and for the transportation and storage of equipment, both indoors and outdoors. Two models available; the 70 litre rigid litter container with sack retention system or sack retention system only.

Design Features

- 70 litre rigid litter container with sack retention system or sack retention system only.
- Front bumper with moulded-in storage system.
- Solid rubber tyres.
- Jockey wheels.
- Reflectors.
- Removable handles.

Optional Extras

- Operator's bag.
- 2 x side storage boxes.
- Personalisation.
- Plastic sacks for use with sack retention.

Materials

Front moulding, lid & rigid litter container: Durapol.
Handles, axles & sack retention system: Stainless steel.

Specifications

	c/w rigid litter container	c/w sack retention only
Container capacity:	70 litres	-
Total height:	950mm	950mm
Total length:	1200mm	1200mm
Total width:	630mm	630mm
Total weight:	22.88kg	18.46kg

Colours

Container: Deep Green, Dark Blue, Dark Grey.
Lid: Cool Light Grey.

Litta-Pikka™

Litta-Pikka collection tool has been purpose-designed for strength, durability and ease of use.

Materials

Litta-Pikka: Reinforced composite tube construction.
Claws, central guide & hinge: Impact-absorbing polymer.

Specifications

Length: 892mm
Weight: 0.5kg

Mobilo™

Mobilo cleaning and service trolley offers a wide variety of benefits required for the easy collection of waste. A strong sack retention system simply holds the sack neatly within the unit and allows for quick removal of the contents. The dual ergonomic handle provides a comfortable grip and allows the user to easily manoeuvre the unit. Mobilo has moulded axle features with wheel recesses and external solid wheels providing stability on uneven surfaces.

Design Features

- Sack retention system.
- Stainless steel skid screws.
- Tool storage hooks.
- Tool retention clips.
- Tool storage pocket.
- Bag/Tool hooks.

Optional Extras

- PVC cover/lid.
- Operators bag with two compartments.
- Pneumatic wheels.
- Reflectors/stickers.
- Personalisation.

Materials

Body & tool storage pocket: Durapol.
Tool retention clips: Nylon.
Operators Bag and Cover/Lid: PVC and Polyester.

Specifications

Capacity: 120 litres
Height: 1080mm
Width: 647mm
Depth: 621mm
Weight: 12kg

Colours

Anthracite Grey, Black (contains recycled material).

A durable mini bollard that protects landscaped or grassed areas from vehicles, cyclists and pedestrians.

Design Feature

- Recessed area for decorative or retroreflective banding. (Non Highways Use).

Optional Extras

- Decorative banding in Gold, retroreflective banding in Red, White, Red and White.
- Chain linking.
- Personalisation.

Material

Durapol.

Specifications

Height above ground: 510mm.
 Depth below ground: 276mm.
 Main stem diameter: 120mm.
 Maximum diameter: 140mm.
 Weight: 1.3kg.

Colours

Black, Millstone, Sandstone, Granite, White.

Vergemaster RXTM

Constructed from ReflexapolTM material to provide good rebound performance in the event of vehicular impact.

Design Features

- Passively safe Reflexapol Material construction.
- Successfully tested to Performance Standard NE4/100Kmh by TRL.
- Moulded-in white band.
- Large, arced, microprismatic Impactalight reflectors for greater visibility.
- Extended Base or Stake Type fixing.

Optional Extras

- Blanking cap.
- Decorative banding in Gold, retroreflective banding in Red, White, Red and White or Yellow.
- Chain linking.

Materials

Post & white band: Reflexapol.
 Reflector: Microprismatic Impactalight.

Specifications

Height above ground: 920mm
 Depth below ground (extended base): 350mm
 Depth below ground (stake type): 523mm
 Total height of post: (extended base): 1270mm
 Total height of post: (stake type): 1443mm
 Diameter: 167mm
 Weight of post: (extended base): 1.8kg
 Weight of post: (stake type): 1.6kg post, 1.1kg stake
 Reflector size: 180mm x 98mm – complies with TSRGD 2002.

Flexmaster[®]

A flexible verge marker post for high-risk locations.

Design Features

- Passively safe Ultraflex Material construction.
- Easy to install using specialist tool.
- Large reflectors.
- Can be supplied in a variety of configurations.

Materials

Post: Ultraflex.
 Reflector: Red and White retroreflective materials.

Specifications

Height above ground: 905mm
 Depth below ground: 405mm
 Overall Height: 1310mm

Victory™

A cannon style bollard that is ideal for environments where preservation of a period or architectural style is desirable.

Design Features

- Two models available, rigid standard model or flexible Rebound model.
- Recessed areas for decorative or retroreflective banding.

Optional Extras

- Aluminium backed and riveted decorative Gold bands.
- Retroreflective banding in Red, White, Red and White or Yellow.
- Personalisation.
- Chain linking.

Materials

Standard model

Durapol (available with Below-Ground Socket System fixing option).

Rebound model

Impactapol - smooth finish (available with Below-Ground Extended Base fixing option).

Specifications

Height above ground: 967mm
 Depth below ground: 500mm (Below-Ground Extended Base Model: 420mm)
 Maximum diameter: 200mm
 Standard Bollard weight: 5kg

Colour

Black.

Neopolitan™ 20

A contemporary style bollard for modern urban environments.

Design Features

- Two models available, rigid Standard model and flexible Rebound model.
- Ideal for protecting premises and property.
- Guardsman fixing offers high strength and impact resistance.
- Recessed areas for decorative or retroreflective banding. (20mm or 150mm)

Optional Extras

- Blanking cap.
- Decorative banding in Gold, retroreflective banding in Red, White, Red and White or Yellow.
- Chain linking.

Materials

Standard model

Durapol (available with Standard Bolt-Down, Concrete- In Anchor (adjustable depth), Below-Ground Socket System or Below-Ground Guardsman Anti-Ram Raid fixing options).

Rebound model

Impactapol (available with Below-Ground Extended Base fixing option).

Specifications

Height above ground: 925mm.
 Main stem diameter: 150mm.
 Maximum diameter: 200mm.
 Standard Bolt Down Bollard weight: (Excluding Fixings): 3.5kg

Colours

Black, Millstone, Sandstone, Dark Blue, Aircraft Grey, Stone, White.

Glasdon Manchester™

The New Glasdon Manchester Bollard is a low-maintenance alternative to traditional cast iron bollards.

Design Feature

- Available as a rigid standard model or a flexible Rebound model.
- Choice of new Lockfast Socket System fixing option, which allows quick and easy bollard top replacement, reducing the need for road closure or costly reinstatement. Below-Ground Extended Base fixing option also available.
- Recessed areas for decorative or retroreflective banding.

Materials

Standard model: Durapol.
 Rebound model: Impactapol.

Specifications

Height above ground: 1005mm
 Maximum diameter: 220mm

Colour

Black.

Jubilee Bollard is a robust, traditionally-styled traffic post suitable for all environments.

Design Feature

- Two models available, rigid Standard model and flexible Rebound model.
- Recessed areas for decorative or retroreflective banding.

Optional Extras

- Decorative banding in Gold, retroreflective banding in Red, White, Red and White or Yellow.
- Chain linking.

Materials

Standard model

Durapol (available with Below-Ground Socket System fixing option).

Rebound model

Impactapol - smooth finish (available with Below-Ground Extended Base fixing option).

Specifications

Height above ground: 942mm
 Depth below ground: 500mm
 Main stem diameter: 180mm
 Maximum diameter: 190mm
 Bollard weight: 5.00kg
 Socket weight: 3.8kg
 Combined weight: 8.8kg

Colour

Black.

Rebound Signmaster™

Retroreflective LED illuminated and Non-illuminated self-righting bollards.

Design Features

- LED illuminated and non-illuminated self-righting bollards.
- Recessed areas for retroreflective side and front panels.
- Two recessed areas for two x Ø300mm signfaces.

Optional Extras

- Fluorescent Yellow retroreflective front, back and side panels.
- Sign options for highways use.
- Other sign options available.
- Choice of light box conversion plates.

Material

Impactapol.

Specifications

Height above ground: 1036mm
 Maximum bollard width: 400mm
 Maximum bollard depth: 200mm
 Bolt-Down foot detail: 328 x 328mm
 Signface: 300mm diameter
 Front/rear patch area: 0.1617m²
 Side patch area: 0.0243m²
 Weight: 6kg

Colours

Black, White, Aircraft Grey.

Infomaster™

Provides highly visible signage for a range of applications.

Design Features

- Infomaster takes up minimal space on the pavement and therefore does not create an obstruction.
- At 1195mm high, Infomaster can be clearly seen through a car windscreen or side window.
- A range of sign options are available. Please telephone our sales office to discuss your requirements.

Material

Durapol.

Specifications

Height above ground: 1195mm
 Width: 370mm

Colours

Black, Millstone.

Fido 25™

Fido 25 dog waste bin has a Durapol self-returning lid and a moulded plastic liner, which is removable for cleaning and disinfecting.

Design Features

- Ultra-destruct 'Dog Waste Only' logo.
- Moulded plastic liner.
- Fixings for wall or post mounting.

Optional Extras

- Choice of fixing options.
- Personalisation.
- Plastic sacks.

Materials

Bin body: Duraplus.
Lid: Durapol.
Moulded plastic liner:
Polyethylene.

Specifications

Capacity: 25 litres
Height: 570mm
Width: 380mm
Depth: 315mm
Weight: 3.7kg

Colours

Red, Deep Green.

Retriever 35™

Retriever 35 can be attached directly to lamp posts or walls. Hygienically designed, Retriever 35 incorporates a removable bin body with a secure metal chute system.

Design Features

- Ultra-destruct 'Dog Waste Only' logo.
- Triangular DIN lock – key to open, slam to lock.
- Sack-retention system.
- Fixings for wall or post mounting.

Optional Extras

- Choice of fixing options.
- Personalisation.
- Plastic sacks.

Materials

Bin body: Durapol.
Chute & backbone: Mild steel with Armortec coating.

Specifications

Capacity: 35 litres
Height: 674mm
Width: 450mm
Depth: 297mm
Weight: 7.1kg

Colours

Red, Deep Green.

Retriever 50™

Retriever 50 is available with two different chute options and features the innovative Mainbrace™ stainless steel backbone, which remains attached to the wall or post during emptying and cleaning.

Design Features

- Ultra-destruct 'Dog Waste Only' logo.
- Choice of Armortec coated steel chute or Durapol material chute.
- Internal fire shield (supplied as standard when Armortec coated steel chute is specified with steel liner).
- Triangular DIN lock – key to open, slam to lock.
- Mainbrace stainless steel backbone.
- Sack-retention system or zinc-coated steel liner.

Optional Extras

- Choice of fixing options.
- Personalisation.
- Plastic sacks.

Materials

Bin body & hood: Durapol.
Chute: Durapol or Armortec coated steel.
Mainbrace backbone: Stainless steel.
Sack retention system: Stainless steel.
Metal liner: Zinc-coated steel.

Specifications

Capacity: 50 litres (without liner)
Height: 725mm
Width: 500mm
Depth: 400mm
Weight: from 7.4kg
(Durapol chute c/w sack retention)

Colours

Red, Deep Green.

Retriever City™

Retriever City dog waste bin offers an integrated sack dispenser and chute operating system within one unit. Retriever City requires minimal maintenance and is ideal for keeping streets clean in urban areas.

Design Features

- Integral dispenser allows only one sack to be taken at a time.
- Secure, tamper resistant chute system.
- Extremely robust body and door.
- Clear graphics encourage correct use.
- Secure, vandal resistant locking mechanism.
- Door-opening design provides easy access for removal and replacement of sacks.
- Space saving narrow footprint.

Optional Extras

- Choice of ground fixing options.
- Personalisation.

Materials

Bin body & door: Durapol.
Chute: Durapol.

Specifications

Capacity: 35 litres
Height: 1142mm
Width: 439mm
Depth: 348mm

Colours

Body & door: Black, Grey,
Deep, Green, Red.

Metal Fido 35™ & Metal Fido 50™

Metal Fido dog waste bin is ideal for unsupervised areas where there is a high risk of vandalism. The bin requires minimal maintenance as its robust construction provides outstanding strength.

Design Features

- Robust metal construction.
- Two sizes available – a 35 litre model and a 50 litre model.
- Dog Lead Hook.
- 1.5mm Armortec® coated steel.
- Pivoting lid with lid stay.
- Sack retention system.

Optional Extras

- Choice of fixing options.
- Personalisation.

Materials

Body & lid: Armortec Coated Steel.
Sack Retention System: Stainless Steel.

Specifications

Metal Fido 35

Capacity: 35 litres
Bin Height: 504mm
Body Width: 344mm
Body Depth: 234mm
Lid Width: 369mm
Lid Depth: 287mm
Weight: 11.3kg

Metal Fido 50

Capacity: 50 litres
Bin Height: 764mm
Body Width: 344mm
Body Depth: 234mm
Lid Width: 369mm
Lid Depth: 287mm
Weight: 14.7kg

Takes 380mm diameter refuse sacks.

Colours

Red, Deep Green.

Tough Metal Construction

Dog Lead Hook enables owners to secure their dog whilst using the bin.

web: www.glasdon.com

Slimline™

Design Features

- Ideal for grit/salt storage where space is limited.
- Manufactured in tough Durapol material for all-weather durability.
- Vandal resistant.

Specifications

Capacity: 160 litres
 Length: 838mm
 Height: 750mm
 Width: 515mm
 Weight capacity: 208kg (holds approx 8 x 25kg bags of rock salt)
 Area of coverage: 4,160m² @ 50gms/m²

Colours

Yellow, Beige, Deep Green, Red.

Nestor™ MKII

Design Features

- Ideal for car parks and yards where a larger container is required.
- Units will stack together for easy storage in the summer months or during transportation.
- Easy to handle.

Specifications

Capacity: 370 litres
 Length: 1163mm
 Height: 802mm
 Width: 746mm
 Weight capacity: 488kg (holds approx 18 x 25kg bags of rock salt)
 Area of coverage: 9,760m² @ 50gms/m²

Colours

Yellow, Beige, Deep Green.

Rollastor™

Design Features

- Ideal for premises where sites may be awkward to grit from a static container.
- Can be easily wheeled from one central point to another.
- Equipped with a front hopper feed aperture allowing easy removal of contents.

Specifications

Capacity: 110 litres
 Length: 480mm
 Height: 945mm
 Width: 550mm
 Weight capacity: 132kg (holds approx 5 x 25kg bags of rock salt)
 Area of coverage: 2,900m²

Colour

Dark Grey.

Orbistor 800™

Design Features

- Ideal for large sites or remote areas.
- Spherical design provides unbeatable strength.
- Moulded-in drainage channels prevent any accumulation of water ensuring contents stay dry.

Specifications

Capacity: 800 litres
 Length: 1075mm
 Diameter: 1280mm
 Weight capacity: 1000kg (holds approx 40 x 25kg bags of rock salt)
 Area of coverage: 20,000m² @ 50gms/m²

Colours

Yellow, Deep Green.

Cruiser Manual 50™

Design Features

- Can be used with dry, damp or wet material.
- Rotating rubber paddles ensure material is dispensed evenly.
- Adjustable handle enables accurate controlled spreading.

Specifications

Capacity: 53 litres
 Length: 1115mm
 Width: 790mm
 Height: 955mm
 Unladen weight: 48kg
 Area of coverage: 900m² @ 100gms/ m²

Cruiser Turbocast 300™

Design Features

- Spreads to a width of between 3m and 7m with minimum effort.
- Spreads dry or wet grit/salt mixture.
- Simply wheel forward to disperse the material.

Specifications

Capacity: 52 litres (holds approx 2.5 x 25kg bags of rock salt)
 Length: 1235mm
 Width: 670mm
 Height: 950mm
 Unladen weight: 43kg

Cruiser Towable 80™

Design Features

- Effectively spreads wet and dry grit, grit/salt mixture or sand.
- A rubber plate moves the grit with a continuous rippling action ensuring it does not clog.
- Easy to empty and clean.

Specifications

Capacity: 160 litres
 Length: 1555mm
 Width: 1270mm
 Height: 900mm
 Unladen weight: 85kg
 Maximum laden weight: 360kg
 Area of coverage: 2,270m² @ 100gms/ m²

Icemaster Manual 50™

Design Features

- Ideal for smaller locations where larger machines cannot effectively operate.
- Adjustable flow control and a spinning thrower plate mechanism ensures a wide spreading action.

Specifications

Capacity: 50 litres
 Width: 655mm
 Unladen weight: 16kg
 Weight capacity: 55kg (holds approx 4 tubs of Glasdon ICEMELT)
 Area of coverage: 845m²
 Maximum spreading width: 2750mm

Telephone: 01253 600415
 Fax: 01253 792558
 e-mail: ni@glasdon-uk.co.uk
 web: www.glasdon.com

Cruiser Turbocast Towable 1000™

Design Features

- Large capacity.
- Effectively spreads both wet and dry grit/salt.
- Spreads to a width of approximately 10 metres (based on dry white rock salt).
- Accurate controlled spreading, eliminating any waste.
- Broadcast spreading or direct drop spreading using the unique twin side deflectors.

Specifications

Capacity: 430 litres
 Side Deflectors not in use:
 Length: 2676mm
 Width: 1637mm
 Side Deflectors in use:
 Length: 2966mm
 Width: 1590mm
 Load height: 1151mm
 Towbar height: 462mm
 Maximum payload: 500kg (holds approx 20 x 25kg bags of rock salt)
 Unladen weight: 250kg
 Maximum laden weight: 750kg
 Maximum spreading width: Approx 10 metres.

Snowshovel™

For snow clearance, Snowshovel beats awkward heavy spades. Snow covered steps and door entrances can be cleared quickly and easily. Simple to use, purpose-designed Snowshovel with its broad-angled blade, removes even deep snow with ease.

Snowscoop™

Simple use, Snowscoop takes the hard work out of snow shovelling. Lightweight and easy to push, it quickly 'scoops' away snowdrifts from entrance areas, footpaths and car parks. Wheels are recessed into the 680mm wide steel blade to prevent jamming during snow clearance.

Icemelt™

Icemelt is ideal for icy steps, sloping paths and uneven surfaces. The unique ice-penetrating formula works faster, spreads further and is more effective than conventional rock salt. One tub of 12.5 litres is sufficient to cover 250m². Even if re-freezing occurs, Icemelt's special ice-penetrating action will ensure that the surface remains safe to walk on. (Also available in 25kg bags)

Snowdozer™

Your own forklift truck can soon be converted into a powerful and effective snow removal machine. The Glasdon Snowdozer is a unique, easy to fit attachment. Simply slide over the forklift truck forks and tighten fixings by hand to secure.

Specifications

Blade

Width: 1750mm
Internal diameter: 630mm
Blade thickness: 15mm
Angle of sweep: 25 degrees to the left.

Frame

Width of blade support: 1220mm
Height of blade support: 50mm

Length of legs

Right leg: 700mm
Left leg: 1000mm
Width of legs: 150mm

Depth of legs

Right leg: 650mm
Left leg: 900mm
Width of legs: 180mm

Digga™

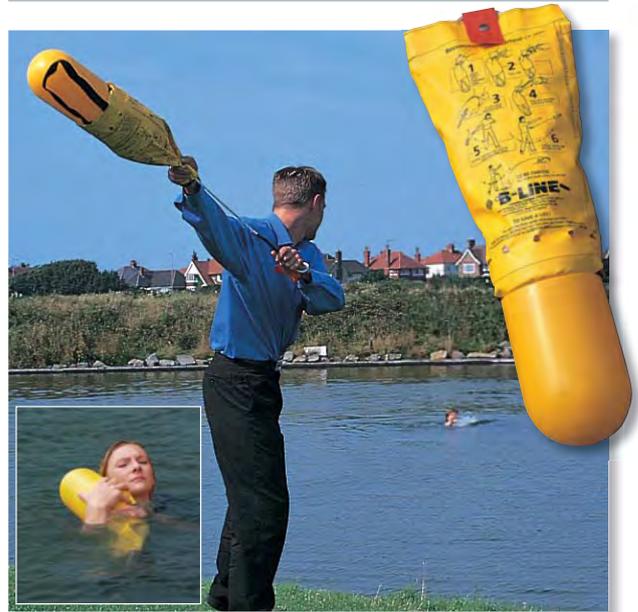

Dig yourself out of trouble with this lightweight shovel. Made from robust polypropylene with a steel pin-reinforced shaft the Digga unscrews into two sections, fitting easily into the boot of a car. Once assembled, the Digga will fit inside a grit/salt container.

Lifebuoy Housings

Constant exposure to the elements can cause deterioration of vital life saving equipment. Glasdon Lifebuoy Housings, manufactured in Durapol® material, help to protect water rescue equipment from storm damage and also act as a deterrent to vandals and thieves, reducing the frequency of costly Lifebuoy replacement. Available as wall, post and rail mounted models. Please telephone our sales office for further information.

B-Line™

The light weight and streamlined design of B-Line means that it can be thrown further and more accurately to the victim, increasing the chances of a successful rescue. Compact and portable, B-Line is the ideal water rescue aid for carrying by Emergency Service vehicles and for siting at external or internal water spaces.

Westby™ Seat

The Westby seat is a generously proportioned, comfortable seat. Constructed using generous sections of FSC Hardwood.

Specifications

Length: 1500mm
 Depth: 640mm
 Height: 900mm
 Seat Height: 455mm
 Weight: 35kg
 Supplied: Fully assembled for immediate use.

Fixing options

(Please see page 42)

Norbreck™ Seat

Constructed in FSC Hardwood, the Norbreck's strong structure is hard-wearing and long lasting. The seat incorporates flat armrests.

Specifications

Length: 1500mm
 Depth: 640mm
 Height: 980mm
 Seat Height: 455mm
 Weight: 35kg
 Supplied: Fully assembled for immediate use.

Fixing options

(Please see page 42)

Larbreck™ Seat

Larbreck seat integrates well with natural surroundings. It features fully sculpted back rails giving a high degree of comfort. Constructed from FSC hardwood, its strong structure is hard-wearing and long-lasting. Larbreck seat is supplied fully assembled for immediate use.

Specifications

Length: 1500mm
 Depth: 640mm
 Height: 980mm
 Seat Height: 455mm
 Weight: 35kg
 Supplied: Fully assembled for immediate use.

Fixing options

(Please see page 42)

Phoenix™ Seat

The Phoenix seat is robustly designed with fully recycled end supports and slats. This heavy duty seat offers durability, weather-resistance and low maintenance. Phoenix seat can be supplied with or without armrests.

Specifications

Length: 1790mm
 Depth: 574mm
 Seat Height: 428mm
 Overall Height: 702mm
 Total seat weight including:
 Enviropol® slats 75kg
 Enviropol® slats c/w 2 armrests 90kg
 Timberpol® slats 79kg
 Timberpol slats c/w 2 armrests 94kg
 Supplied: Fully assembled for immediate use.

Seat material options

Brown Enviropol, Black Enviropol, Timberpol.

Fixing options

(Please see page 42)

Phoenix Jubilee™ Seat

The Phoenix Jubilee seat offers superb strength with minimal maintenance. Black Enviropol® seat ends are standard and the slats are available in a choice of brown or black Enviropol® or Timberpol® material. The seat frame is manufactured in mild steel with an Armortec® corrosion-resistant coating to give added protection and a long service life.

Specifications

Length: 1970mm
 Depth: 780mm
 Seat Height: 460mm
 Overall Height: 880mm
 Total seat weight including:
 Enviropol® slats: 115kg
 Timberpol® slats: 119kg
 Supplied: Fully assembled for immediate use.

Seat material options

Brown Enviropol, Black Enviropol, Timberpol.

Fixing options

(Please see page 42)

Eco-Rest™ Seat & Bench

The Eco-Rest range comprises Enviropol® material sections with two steel frame supports. All slat fastening nuts have a tamper-resistant feature to prevent unauthorised removal of sections.

Specifications

	Seat	Bench
Overall Length:	1790mm	1790mm
Depth:	586mm	410mm
Seat Height:	435mm	422mm

Munchy™ The Caterpillar Seat

The friendly character and bright colours of Munchy provides an excellent and appealing seat for children. The interlocking system of the Munchy seat ensures each module is securely locked together which provides no finger traps or sharp edges.

Specifications

Weights:
 Head: 5.9kg
 Body: 9.4kg
 Tail: 3.0kg
 Standard Model: 27.7kg

Fixing options

The Munchy Seat can either be surface fixed using concrete anchor bolts or supplied with pvc feet for a free-standing application. Sand ballasting is available for the free-standing option to provide additional security against unauthorised movement or theft.

Treblo™ Seat

Available in six vibrant colours, Treblo provides an exciting and appealing seat for children. Suitable for use indoors or outdoors. It is ideal for any children's play area, including schools, nurseries, children's hospitals, leisure parks, recreation areas, zoos, theme parks, tourist and picnic areas.

Specifications

Length: 850mm
 Depth: 910mm
 Height: 490mm
 Weight: 10.1kg

Colours

Red, Green, Blue, Black, Yellow, Orange.

Fixing options

The Treblo Seat is supplied with pvc feet for a free-standing application. Optional kits are also available for fixing to concrete foundations and walls.

Lo-Co™ Children's Steam Train Seat

Different curves and textures provide interesting tactile surfaces for children. Large radii and no sharp corners reduce the risk of injury. Optional sticker kits encourage children to interact with the seat.

Specifications

Overall Length: 1917mm
 Depth: 500mm
 Height: 495mm
 Weight: 17.4kg

Colours

Red, Green, Blue, Black, Yellow, Orange.

Fixing options

The Lo-Co Seat is supplied with pvc feet for a free-standing application. Optional kits are also available for fixing to concrete foundations.

Cyclone™

Cyclone is a unique cycle stand that needs no groundwork and is ready to use in minutes. Cyclone has been designed with a wedge shaped base plinth which, secured together using tamper resistant linking brackets allows for the formation of various layouts.

Bi-Stander™

Manufactured from Armortec® coated steel framework, the Bi-Stander range provides the ideal solution where uncovered bicycle parking facilities are required. Available in a wall-mounted or ground-fixed format, the range offers a comprehensive choice of single and double-sided stands and hoops.

Eclipse Canopy™

Eclipse canopy provides weather protection for the occupants in a variety of applications, for example, ATM covers, passenger waiting shelters and smoking stations.

Midi Bi-Minder™

A flexible solution for cycle storage. Each shelter accommodates 2 bicycles. Midi Bi-Minder has a compact footprint making it ideal for confined spaces. Additional shelters can be installed to increase capacity when required.

Please contact our Sales Office for specification and fixing options on the above products.

Litter Bins - Fixings & Options Guide

For use where bins may be removed and later resited. Flush ground fixing means that there is no trip hazard from protruding objects above ground level.

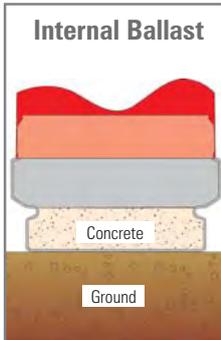

Hexagonal concrete plinth fixed with bolts to bin.

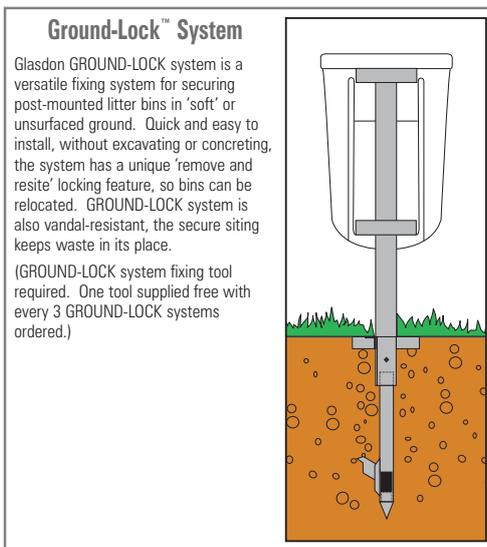

Limpet quick release ground fixing system will fix a litter bin in place as securely as if bolted down but allows the bin to be quickly removed. Litter bins fitted with LIMPET fixing can be removed or resited in just 30 seconds. The LIMPET fixing should not be used in cases where no rigid liner is required.

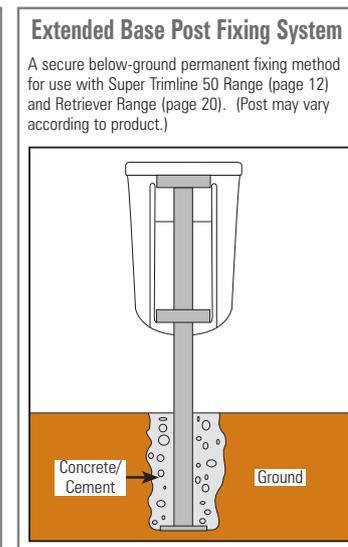

Glasdon GROUND-LOCK system is a versatile fixing system for securing hooded, open-topped and post-mounted litter bins in 'soft' or unsurfaced ground. Quick and easy to install, without excavating or concreting, the system has a unique 'remove and resite' locking feature, so bins can be relocated. GROUND-LOCK system is also vandal-resistant, the secure siting keeps waste in its place. (GROUND-LOCK system fixing tool required. One tool supplied free with every 3 GROUND-LOCK systems ordered.)

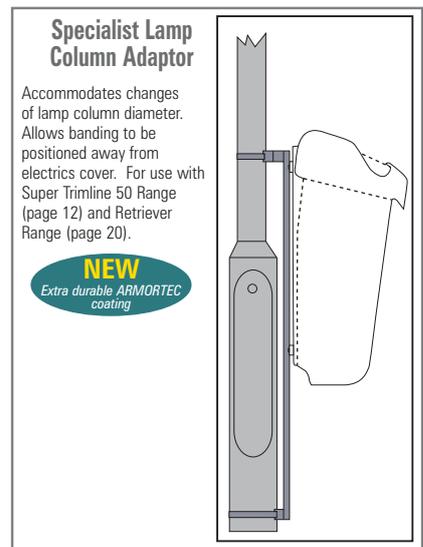

Post Mounting Litter Bins & Dog Waste Containers

Glasdon GROUND-LOCK system is a versatile fixing system for securing post-mounted litter bins in 'soft' or unsurfaced ground. Quick and easy to install, without excavating or concreting, the system has a unique 'remove and resite' locking feature, so bins can be relocated. GROUND-LOCK system is also vandal-resistant, the secure siting keeps waste in its place. (GROUND-LOCK system fixing tool required. One tool supplied free with every 3 GROUND-LOCK systems ordered.)

A secure below-ground permanent fixing method for use with Super Trimline 50 Range (page 12) and Retriever Range (page 20). (Post may vary according to product.)

Accommodates changes of lamp column diameter. Allows banding to be positioned away from electrics cover. For use with Super Trimline 50 Range (page 12) and Retriever Range (page 20).

NEW
Extra durable ARMORTEC coating

Bollards - Fixings & Options Guide

Standard Bolt-Down Fixing
(onto existing concrete foundations)

A strong bolt-down fixing, which is quick to install with minimum disruption. Suitable for existing concrete sub-surfaces. In the event of damage the bollards are easy to replace by using the existing fixing. Ideal for installation where below-ground fixing is not possible. For example, if there are underground electricity cables or water supplies, or on bridges and multi-storey car parks where there could be waterproof membranes.

Concrete-in Anchor
(adjustable depth)

Easy to install, allows easy replacement of the bollard if required. This can be used in areas where there is not an existing suitable concrete sub-surface to bolt down to. Easy to install and once in place allows simple reinstatement of the bollard without the need for additional groundwork.

Below-Ground Socket System

Ease of replacement allows permanent, semi-permanent or temporary applications. The socket is designed to absorb the impact of a collision in most cases, leaving the surrounding area undamaged. One dual purpose key removes the bollard and locks/removes the blanking cap. If the bollard is removed, the galvanised steel blanking cap can be used to maintain pedestrian safety and vehicular access.

Below-Ground Extended Base

The extended base or fixing tube of the bollard is secured in concrete for permanent fixing.

Below-Ground Guardsman™ Anti-Ram Raid

Guardsman fixing offers strength and style. The reinforcing tube is sited 745mm below ground providing an integral root for high strength and impact resistance. The hole is packed with gravel and a substantial layer of concrete. The reinforcing tube is also filled with concrete for maximum strength. When the concrete has set, the bollard sleeve is secured with coupling bolts, which are hidden from view. Guardsman fixing is ideal for protecting premises and property. Impact tested by an unladen van at speeds of 25-30mph - the van was stopped dead.

Guardsman™ anti-ram raid is a reinforced, site protection bollard fixing for improved 24-hour security.

Seating Collection - Fixings & Options Guide

We strongly recommend ground fixing for safety and security.

Base Fixing Options

- Most Glasdon seating can be supplied with different fixing kits suitable for either:
1. Fixing to a concrete base.
 2. Fixing to paving slabs.
 3. Fixing into concrete pockets using below-ground anchors (for grass or other soft ground).

	Page	Fixing Options
Westby Norbreck Larbreck	34	An optional surface fixing kit is available for securing to a flat, level concrete base or to paving slabs. Tamper-resistant cover caps are also available for added security.
Phoenix Phoenix Jubilee	35	Supplied as standard with surface fixing bolts for securing to a flat, level concrete base. Optional kits are also available for fixing to paving slabs or to suit below-ground concrete foundations. Tamper-resistant cover caps are also available for added security.
Eco-Rest	35	An optional surface fixing kit is available for securing to a flat, level concrete base or to paving slabs. An alternative fixing kit is offered to suit below-ground concrete foundations. Tamper-resistant cover caps are also available for added security.
Picnic Table	36	An optional surface fixing kit is available for securing to a flat, level concrete base or to paving slabs. However, this kit is supplied as standard with the wheelchair access version. Tamper-resistant cover caps are also available for added security.
Stanford Metro	36	Supplied as standard with surface fixing bolts and tamper-resistant cover caps for securing to a flat, level concrete base.
Alturo Venturo	37	Optional kits are also available for fixing to paving slabs or to suit below-ground concrete foundations.

High Performance Materials

Glasdon products are manufactured from high performance materials and undergo stringent quality checks to ensure durability and best value. We have accreditation with ISO 9001:2000, underlining our commitment to provide quality products.

Throughout this brochure reference is made to the following materials:

Armortec® is a corrosion resistant coating, which is specially formulated to extend the life of Glasdon metal products and components used externally.

Duraplus™ material is a polymer specially engineered to provide enhanced resilience, which gives improved recovery from impact.

Durapol® material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2008 test procedure. Durapol will not chip or rust, is easy to clean and never needs painting.

Duracore™ material features a tough, dense outer wall with a cellular construction giving outstanding performance benefits and is formulated to withstand extremes of temperature. Duracore will not chip or rust, is easy to clean and never needs painting.

Duraplene™ material comprises a range of polymers which have been formulated for internal applications offering reliability and low maintenance.

Duratec™ material has been specially created for use in internal environments. In addition to its attractive appearance it offers a blend of toughness, rigidity and dimensional stability.

Enviroplus® material range of environmental furniture is manufactured entirely from recycled materials (post industrial plastics). By balancing these uncontaminated recycled waste materials, the result is a remarkably versatile product with many applications and benefits.

Enviro-pol® material is manufactured predominantly from post-consumer plastics. By balancing these uncontaminated recycled waste materials, the result is a remarkably versatile product with many applications and benefits. Enviro-pol will not chip or rust, is easy to clean and never needs painting.

Impactapol® material is a polymer specially developed with enhanced flexibility and extensibility properties offering good recovery performance after vehicular impact. Impactapol has abrasion resistance, the material will not chip or rust and never needs painting.

Reflexapol® material is a polymer specially engineered for long service life in exposed locations. It has very good recovery properties and will never need painting.

Timberpol® is a durable and strong composite material containing a minimum 70% recycled hardwood sawdust and recycled polypropylene. It is self-coloured and virtually maintenance-free.

Ultraflex™ material is a polymer formulated to withstand harsh environments and has enhanced flexibility and extensibility properties offering good recovery performance after vehicular impact.

Vandalex® material is an aluminium alloy engineered to produce a high modulus of elasticity, which offers increased impact absorption properties. Its hard anodised finish will not rust, is easy to clean and never needs painting.

All Glasdon products manufactured from Durapol, Duraplus, Duracore, Enviro-pol, Vandalex and stainless steel can be recycled at the end of their service life.

FIREXPIRE® - Fire Safety Device

Firexpire device is a fire extinguishing plate fitted within the bin top. Should a fire break out inside the bin, a special replaceable, heat responsive device releases the plate which then seals off the mouth of the liner and snuffs out the fire through oxygen starvation. Replacement of the heat responsive device using only a screwdriver resets Firexpire device on site.

(FIREXPIRE device is an effective low cost auxiliary device and must never replace primary fire prevention measures. Obstructions preventing the plate from dropping may adversely affect the function of the unit and as many FIREXPIRE devices are used in unsupervised locations, regular inspection and immediate replacement of any damaged or distorted components is essential.)

Stage 1 A burning match is carelessly discarded into a litter container.
Stage 2 The fire takes hold.
Stage 3 In under a minute, the fire extinguishing plate drops on to the liner.
Stage 4 The fire is contained.

Glasdon FireSafe™

Glasdon FireSafe is an automatic fire suppression device fitted within the hood of the bin. Should a fire break out inside the bin the device is activated. (A regular inspection/maintenance programme should be introduced to ensure the device is in working condition or has discharged and therefore needs replacing.)

Personalisation
